PROCEEDINGS OF THE 1992 HYPERVELOCITY IMPACT SYMPOSIUM

Contents

N. Jones	ix	Editorial
C. E. Anderson, Jr and S. J. Bless	xi	Preface
C. E. Anderson, Jr, D. L. Littlefield and J. D. Walker	1	Long-rod penetration, target resistance, and hypervelocity impact
J. A. Ang, B. D. Hansche, C. H. Konrad, W. C. Sweatt, S. M. Gosling and R. J. Hickman	13	Pulsed holography for hypervelocity impact diagnostics
Y.C. Angel and J. P. Smith	25	Critical response of shielded plates subjected to hypervelocity impact
N. Ari and J. S. Wilbeck	37	Debris fragment characterization in oblique hypervelocity impacts
D. Atkinson and A. Watts	49	Impact damage and optical scatter
S. Bahk, D. Chavez, B. Emery, B. Wilson and J. Stoltzfus	61	Protecting aluminum alloy from particle-impact ignition with an Al_2O_3 film
J. R. Baker and M. A. Persechino	73	An analytical model of hole size in finite plates for both normal and oblique hypervelocity impact for all target thicknesses up to the ballistic limit
S. J. Bless and C. E. Anderson, Jr	85	Penetration of hard layers by hypervelocity rod projectiles
M. B. Boslough, J. A. Ang, L. C. Chhabildas, W. D. Reinhart, C. A. Hall, B. G. Cour-Palais, E. L. Christiansen and J. L. Crews	95	Hypervelocity testing of advanced shielding concepts for spacecraft against impacts to 10 km/s
K. G. Budge and J. S. Peery	107	RHALE: a MMALE shock physics code written in C++
L. C. Chhabildas, J. E. Dunn, W. D. Reinhart and J. M. Miller	121	An impact technique to accelerate flier plates to velocities over 12 km/s
L. C. Chhabildas, E. S. Hertel and S. A. Hill	133	Hypervelocity impact tests and simulations of single Whipple bumper shield concepts at 10 km/s
E. L. Christiansen	145	Design and performance equations for advanced meteoroid and debris shields
E. L. Christiansen, E. Cykowski and J. Ortega	157	Highly oblique impacts into thick and thin targets

E. L. Christiansen and J. H. Kerr	169	Mesh double-bumper shield: a low-weight alternative for spacecraft meteoroid and orbital debris protection
T. Cooper	181	A novel method for launching flyer plates
B. G. Cour-Palais, A. J. Piekutowski, K. V. Dahl and K. L. Poormon	193	Analysis of the UDRI tests on Nextel multi-shock shields
D. A. Crawford and P. H. Schultz	205	The production and evolution of impact-generated magnetic fields
J. P. Curtis	217	The effects of a random off-axis velocity component on the penetration achieved by long rod kinetic energy penetrators and shaped charge jets
E. P. Fahrenthold	229	A Lagrangian model for debris cloud dynamics simulation
S. A. Finnegan, J. K. Pringle, J. C. Schulz, O. E. R. Heimdahl and A. J. Lindfors	241	Impact-induced delayed detonation in an energetic material debris bubble formed at an air gap
J. D. Frey, F. Janicot, X. Garaud, P. Groenenboom and M. Lambert	255	The validation of hydrocodes for orbital debris impact simulation
M. D. Furnish	267	Recent advances in methods for measuring the dynamic response of geological materials to 100 GPa
I. Gilath, S. Eliezer, T. Bar-Noy, R. Englman and Z. Jaeger	279	Material response at hypervelocity impact conditions using laser induced shock waves
J. J. Gilman	291	Metallization and insulization during impact
F. I. Grace	303	Nonsteady penetration of long rods into semi-infinite targets
D. J. Grosch and J. P. Riegel	315	Development and optimization of a "micro" two-stage light-gas gun
V. Hohler, H. Nahme, R. Tham, A. Stilp, K. Weber, Y.-K. Yeh, J.-P. Wang and T.-S. Lee	325	Experimental and numerical simulation of high velocity impact on steel targets
K. A. Holsapple	335	Hypervelocity impact experiments in surrogate materials
F. Hörz, M. J. Cintala, R. P. Bernhard and T. H. See	347	Dimensionally scaled penetration experiments to extract projectile sizes from space exposed surfaces

W. M. Isbell and W. J. Tedeschi	359	Hypervelocity research and the growing problem of space debris
G. R. Johnson and W. H. Cook	373	Lagrangian EPIC code computations for oblique, yawed-rod impacts onto thin-plate and spaced-plate targets at various velocities
G. R. Johnson, E. H. Petersen and R. A. Stryk	385	Incorporation of an SPH option into the EPIC code for a wide range of high velocity impact computations
W. H. Jolly and J. E. Williamsen	395	Statistical ballistic limit curve regression for Space Station *Freedom* meteoroid/orbital debris shielding
S. E. Jones, R. B. Marlow, J. W. House and L. L. Wilson	407	A one-dimensional analysis of the penetration of semi-infinite 1100-0 aluminum targets by rods
J. F. Kerrisk and J. K. Meier	417	Problems associated with launching hypervelocity projectiles from the fast shock tube
M. E. Kipp, D. E. Grady and J. W. Swegle	427	Numerical and experimental studies of high-velocity impact fragmentation
R. J. Lawrence and W. M. Trott	439	Theoretical analysis of a pulsed-laser-driven hypervelocity flyer launcher
R. Lee, J. Osher, H. Chau, M. Gerassimenko, G. Pomykal and R. Speer	451	The impact of flat, thin plates on aluminum targets in the 5–10 km/s velocity range
J. P. Leyrat, E. Charvet and H. C. Pujols	467	Creation and simulation of very fast jets
T. D. Maclay, R. D. Culp, L. Bareiss, T. G. Gillespie and F. M. Kustas	479	Topographically modified bumper concepts for spacecraft shielding
D. A. Mandell and R. Henninger	491	Ceramics models in the MESA codes
J. L. Mayes, S. L. Hatfield, P. P. Gillis and J. W. House	503	Void formation in OFE copper
R. A. McDonald, W. G. Tanner and W. M. Alexander	509	A comparison of hole size formation caused by a hypervelocity impact with a thin film using molecular dynamics and CTH
R. A. Mog, M. J. Helba and J. H. Robinson	519	Development and optimization of a multi-bumper design model for spacecraft protective structures
W. J. Nellis and A. J. Gratz	531	Recovery of materials impacted at high velocity

G. D. Olsen and A. M. Nolen	541	Advanced shield design for Space Station *Freedom*
D. L. Orphal, C. E. Anderson, Jr, R. R. Franzen, J. D. Walker, P. N. Schneidewind and M. E. Majerus	551	Impact and penetration by $L/D \leq 1$ projectiles
M. A. Persechino and A. E. Williams	561	Tumbling of hypervelocity rods induced by impact with oblique plate targets
A. J. Piekutowski	573	Characteristics of debris clouds produced by hypervelocity impact of aluminum spheres with thin aluminum plates
W. Reschauer and E. Igenbergs	587	Experiments on the hypervelocity penetration of thin aluminium sheets
M. Sanai and J. D. Colton	597	Explosive simulation to investigate enhanced ablator removal
I. Saravane and A. E. Williams	607	The size, velocity and trajectory of debris fragments produced by impact with plate targets
E. M. Schmidt, B. J. Held and D. S. Savick	619	Hypervelocity launch dynamics
E. Schneider, A. Stilp, M. Rott, F. Levadou and G. Schwehm	631	Hypervelocity impact simulation experiments on LDEF-foils
W. P. Schonberg	637	Effect of internal stress fields on the perforation response of dual-wall structures under hypervelocity impact
W. P. Schonberg and F. Yang	647	Response of space structures to orbital debris particle impact
P. H. Schultz	659	Impact crater growth in an atmosphere
G. L. Y. Shephard and S. A. Scheer	671	Secondary debris impact damage and environment study
C. G. Simon	683	Hypervelocity impact testing of micrometeorite capture cells in conjunction with a PVDF thin-film velocity/trajectory sensor and a simple plasma velocity detector
T. H. Sobota, S. M. Babcock and J. W. Humphrey	695	Development of a Scramaccelerator based hypervelocity launcher
R. F. Stellingwerf and C. A. Wingate	707	Impact modeling with smooth particle hydrodynamics

G. L. Stradling, G. C. Idzorek, B. P. Shafer, H. L. Curling, Jr, M. T. Collopy, A. A. Hopkins Blossom and S. Fuerstenau	719	Ultra-high velocity impacts: cratering studies of microscopic impacts from 3 km/s to 30 km/s
W. G. Tanner, Jr, R. A. McDonald, W. M. Alexander and C. R. Maag	729	An examination of hypervelocity particle penetration parameters for thin films flown in space
L. E. Thompson and M. S. Johnson	739	Response of woven ceramic bumpers to hypervelocity impacts
P. Tsou and D. J. Griffiths	751	Exploratory investigations of hypervelocity intact capture spectroscopy
J. D. Walker, D. J. Grosch and S. A. Mullin	763	A hypervelocity fragment launcher based on an inhibited shaped charge
J. M. Walsh, G. L. Stradling, G. C. Idzorek, B. P. Shafer and H. L. Curling, Jr	775	Microparticle impacts at ultra-high velocities: their relation to macroparticle impacts
J. A. Waschl and D. J. Hatt	785	Characterization of a small-scale exploding bridge foil flyer generator
K. Weber, V. Hohler and A. J. Stilp	797	Impact flash and debris cloud expansion of high-pure metal foils
C. A. Weickert and P. J. Gallagher	809	Penetration of explosively formed projectiles
C. A. Wingate, R. F. Stellingwerf, R. F. Davidson and M. W. Burkett	819	Models of high velocity impact phenomena
J. D. Yatteau and D. L. Dickinson	831	An engineering model to predict perforation damage to plates impacted by high velocity debris clouds
D. Yaziv and J. P. Riegel	843	The application of the integral theory of impact to model penetration of hypervelocity impact
C. H. Yew, D. E. Grady and R. J. Lawrence	851	A simple model for debris clouds produced by hypervelocity particle impact
L. Zernow and E. J. Chapyak	863	Experimental and analytical study of early time material processing, in a collapsing shaped-charge liner, using "softly-recovered" partially-collapsed copper liners
